COVID-19 notification for Liquid Zoo, Kelowna

KELOWNA – Further testing of individuals has allowed Interior Health (IH) to identify an additional location in Kelowna where individuals may have been exposed to COVID-19.

Individuals who visited Liquid Zoo, 74 Lawrence Ave. in Kelowna, from July 15-18 are asked to **self-monitor** closely for symptoms of COVID-19 for 14 days and to get tested if they begin to exhibit symptoms.

Public health contact tracing is under way, and where possible, IH is reaching out directly to individuals who have been exposed.

Individuals seeking a test should call their primary care provider (family physician or nurse practitioner) or the closest [Interior Health community testing and assessment centre](#).

COVID-19 testing

Testing is recommended for anyone experiencing symptoms of COVID-19, including:

- Fever
- Cough
- Shortness of breath or difficulty breathing
- Loss of sense of taste or smell
- Other milder symptoms may include: runny nose, fatigue, body aches (muscles and joints aching), diarrhea, headache, sore throat, vomiting and red eyes.

IH reminds everyone of the importance of following COVID-19 precautions:

- Stay home and avoid travel if you have symptoms, even mild ones.
- Maintain physical distancing (two metres apart) and use masks when distancing is not possible.
- Wash your hands regularly and do not touch your face.
- Do not plan or attend gatherings of more than 50 people. Limit gatherings to out of doors whenever possible.

Information on public exposures to COVID-19 within the Interior Health region are available here:
