

For Immediate Release | July 14, 2021

Clinical Services Building parkade closing temporarily for maintenance

KAMLOOPS – The Royal Inland Hospital’s Clinical Services Building (CSB) parkade will closed for preventative maintenance from Saturday, July 18, 2021 until Wednesday August 18, 2021.

The CSB parkade requires a complete closure to replace the traffic coating that protects the concrete surface from seasonal road grime (salt and sand). The existing coating is no longer effective and requires replacement prior to the winter season.

The closure is taking place during the summer months when staffing levels, and patient and visitor levels are lower.

Patient and visitor parking will be moved to the staff parkade during the closure, and staff parking will be made available throughout various locations surrounding Royal Inland Hospital.
