## Community Health Services Centre resumes clinical services

KELOWNA– Effective Friday, April 17, the Community Health Services Centre (CHSC), 505 Doyle Avenue, Kelowna, will resume clinical services.

These clinical services were temporarily relocated following a water leak in the plumbing system at CHSC on April 6. Repairs have been completed and remediation in some contained areas continues. The contained areas do not impact clients, staff, or safety.

Interior Health appreciates the challenges this situation presented to the local community and thanks all clients and staff for their patience.
