Turn over page for tips on healthy growth and development

18 Months: Tips for My Healthy Growth and Development

Physical and Social / Emotional Development

- Help me get at least 3 hours of activity, including energetic play, throughout the day. More is better.
- I learn through playing. Give me safe and interesting activities and places to explore.
- I'm not ready for screen time before I'm 2 years old. My brain is still developing.
- Help me learn how to show my feelings in a healthy way. It is normal for me to sometimes feel a little frustrated while learning a new task. Talk to me calmly about emotions when I have a tantrum.

Safety

- I'm attracted to water and do not understand its danger. Never leave me alone in or near water.
- I can choke easily on food. I should not have nuts, whole grapes, hot dogs, popcorn, gum and hard candy until I'm at least 4 years old.
- I may like to climb but I do not understand the idea of height. Install window guards and stops and keep furniture away from windows. Attach heavy furniture such as bookcases to the wall.
- Sleeping in my crib or my own bed is safest for me. Keep my crib away from windows and blind cords.
- Keep me rear-facing as long as possible in a child car seat that is appropriate for my weight and height. Do not rush to move me to the next stage of car seat.

Behaviours

- Bedtime routines help me learn to go to sleep on my own.
- I need about 11 to 14 hours of sleep each day, including my naps. I may grow out of my morning nap.
- I play best by myself. I have not learned to share yet.

Vision, Hearing and Language

- I should have my vision checked by the time that I'm 3 years old.
- Hearing helps with my language development. My hearing can be tested at any age if you have concerns.
- Talk about what I'm doing and what I'm looking at. Share picture books with me – let me take a turn by saying a word or pointing to a picture.
- Sing simple songs with actions. Pause before a word in a familiar song, so that I can fill in the blank.
- Play pretend games with me, such as going to sleep, talking on the phone or drinking tea.

Feeding and Nutrition

- Continue to breastfeed me. It's recommended for up to 2 years or longer.
- If I'm no longer breastfeeding, offer me 2 cups (500 mL) whole fat cow's milk each day.
- I need 600 IU of vitamin D each day, from food and/or a liquid vitamin D supplement.
- Sit and eat with me. I learn language and social skills along with healthy eating habits by eating with you.
- Offer me a regular routine of 3 meals and 2-3 healthy snacks each day. Include a variety of protein and iron-rich foods, vegetables, fruit and whole grains.
- Let me feed myself. Let me decide what and how much to eat from the foods you offer me.
- I may need to see a new food many times before I will try it.

Healthy Smiles

- Brush my teeth 2 times per day with fluoride toothpaste (the size of a grain of rice) because cavities can start as soon as my teeth appear. Lift my lip to check my teeth when you brush them.
- Give me drinks in a regular open cup instead of a bottle or sip cup. Offer only water between meals and snacks. I do not need juice or other sweet drinks.
