## 6 Months: Tips for My Healthy Growth and Development

### Physical and Social / Emotional Development

- I can hold my head steady, roll in both directions and sit with my back straight when propped.
- I still need many chances to be on the floor.
- I need lots of room to crawl and explore.
- Help me practice sitting and standing while holding onto your hands.
- I'm not ready for screen time before I'm 2 years old.
- I love it when you call me by name, look into my eyes and cuddle me. This is building my bond with you.

### Safety

- It's time to baby proof our home. Look for hazards from my viewpoint by crawling around on the floor.
- I'm curious now and like to explore. Keep items like cleaning products and medicines locked up, out of my sight and reach.
- Sleeping in my crib is safest for me. As soon as I can sit up, move my crib mattress to its lowest position.
- Keep me in a rear-facing car seat for every trip until I'm at least 1 year old and weigh 10 kg (22 lbs). If the manufacturer's weight-limit allows, keep me rear-facing longer. Don't rush to turn me forward-facing too soon. The back seat is safest for me.
- My growing body needs fresh air; keep me away from second-hand smoke and vapour from tobacco, cannabis and vapour products.

### Behaviours

- I need 12 to 16 hours of sleep each day, including naps. It is normal for me to wake up at night.
- Comfort me when I'm unhappy or fussy by rocking me or talking to me in a soft voice. Remember you can't spoil me. Never shake me.

### Vision, Hearing and Language

- I need to see an eye doctor if I have crossed eyes, a lazy eye or a family history of eye problems.
- If I don't react to your voice or sounds, my hearing should be tested at any age.
- Teach me to copy your actions such as peek-a-boo, pat-a-cake and waving bye-bye. These games show me the idea of taking turns during talking.
- When I point to something, say the name of the object or person, so I can hear the words that match what I'm thinking about.
- Sing songs and nursery rhymes to me. Show and talk with me about colourful pictures in my books.
- Let me explore books by holding them, turning them and chewing on them!

### Feeding and Nutrition

- Continue to breastfeed me. It's recommended for up to 2 years or longer.
- Follow my cues for when and how long to feed me.
- Offer me iron-rich food 2 or more times a day such as meat, poultry, fish, iron-fortified cereal, eggs, beans or nut and seed butters (prepared safely). You can offer me these along with other foods such as vegetables and fruit.
- Offer me a variety of safe textures: smooth, mashed, minced, and soft finger foods. Let me practice feeding myself with my hands.
- Let me decide how much to eat. Please don't coax or pressure me to eat.
- I love being included in family meal times. I learn to eat by being with you at the table.

### Healthy Smiles

- When my first tooth arrives, brush it with fluoride toothpaste (the size of a grain of rice) because cavities can start as soon as teeth appear.
- Don't worry if I don't have teeth yet. Everyone has their own schedule for teething.
- If I go to sleep with a bottle give me a bottle with plain water only.
- Please begin to teach me how to use an open cup now. I can drink small amounts of water.
